Election/Restrictions

1. The Applicant's election without traverse of Group I, Claim 79 to 126, in Paper No. 5 is acknowledged. Claims 1 to 78 were not canceled because the request was not made in a separate amendments section of the response. For any amendment to be entered (including the cancellation of claims), a separate amendments section must be included with the requested amendments. The non-elected claims will be canceled upon allowance if not previously canceled by a specific amendment of the Applicant.
2. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a. A lateral MOSFET as depicted in Figure 19
 - b. a p/n junction diode as depicted in Figure 21
 - c. a high voltage bipolar transistor as depicted in Figure 22.
3. The Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.
4. The Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An

argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
6. Should the Applicant traverse on the ground that the species are not patentably distinct, the Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
7. The Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

8. Papers related to this application may be submitted directly to Art Unit 2814 by facsimile transmission. Papers should be faxed to Art Unit 2814 via the Art Unit 2814 Fax Center located in Crystal Plaza 4, room 3C23.
